

EDITORIAL

We are very proud to announce one more edition of the International Journal of Research in Mathematics Education – RIPEM, published by the Brazilian Society of Mathematics Education – SBEM.

This is a special issue of the journal, whose subject is history of mathematical education in the early school years, organized by Prof. Wagner Valente. In this issue, twelve full papers written by authors from Brazil have been published on-line. All of them were carefully revised for grammatical correctness by our English Journal Reviewer, Ms. Maria Isabel de Castro Lima.

We hope that the International Journal of Research in Mathematics Education will improve further in the years to come, receiving more and more submissions from all over the world.

Cláudia Regina Flores
Editor-in-chief
